## PPE advice for hotel-based healthcare worker (HCW) contact with COVID-19 quarantined clients

Note: P2 or N95 masks are only recommended for use when aerosol generating procedures are being undertaken or will occur. In all other instances don a surgical face mask for direct client contact.

### Recommended HCW PPE use according to type of activity and client COVID-19 symptomology

Setting	Activity	Health care worker PPE required	Client PPE required
<p><b>Hotel quarantine floor</b></p> <p>Not entering the client/s room or having direct contact with client/s.</p>	<p>Telephone or online triage to check for recent change in condition or development of symptoms.</p> <p>No direct client contact e.g. walking room hallways.</p>	<ul style="list-style-type: none"> <li>No PPE</li> </ul>	<ul style="list-style-type: none"> <li>No PPE</li> </ul>
<p><b>Doorway indirect contact by HCW</b></p> <p>Clients <b>without</b> symptoms suggestive of COVID-19 (e.g. cough, fever, shortness of breath)</p>	<p>Any doorway visit:</p> <ul style="list-style-type: none"> <li>Able to maintain physical distance of at least 1.5 metres</li> </ul> <p>(e.g. second HCW accompanying primary HCW)</p>	<ul style="list-style-type: none"> <li>Surgical mask</li> <li>Hand hygiene</li> </ul>	<ul style="list-style-type: none"> <li>No PPE</li> </ul>
<p><b>Perform hand hygiene before and after every client contact</b></p>	<p>Any doorway visit:</p> <ul style="list-style-type: none"> <li>1.5 metre physical distance is <b>not feasible</b></li> </ul>	<ul style="list-style-type: none"> <li>Surgical mask</li> <li>Hand hygiene</li> </ul>	<ul style="list-style-type: none"> <li>Client to wear surgical face mask if tolerated</li> <li>Hand hygiene</li> </ul>

**Isolation** is used to separate ill persons who have an infectious disease from those who are healthy (e.g. tuberculosis and confirmed COVID-19 cases).

**Quarantine** is used to separate and restrict the movement of well persons who may have been exposed to an infectious disease to see if they become ill (e.g. returned travelers, cruise line crew and passengers).

## Victorian Quarantine Hotels Medical Service Information

### Overview

The Onsite Doctor Pty Ltd VQHMS provides the primary community based medical practitioner service to quarantined travellers in Melbourne hotels. There are up to 17 sites in the City Centre and Melbourne airport catering for over 3500 guests staying 2 weeks.

The service runs 24 hours, 7 days a week with up to 9 day duty doctors depending the demand profile, overseen by a Clinical Lead and a night duty doctor.

The prevailing principal is that quarantined travellers are community people who are in detention in a hotel room for 2 weeks ( a stressful isolating experience they will have likely never had) and so the service is seeking to assist them through that 2 week period so that they can get home safely and healthy.

The service is provided on site through a combination of telehealth, video conferencing, team care meetings and clinical visits to guests as required undertaken in a safe manner.

The service works with duty nurses, team leaders, mental health nurses, guests own GPs, specialist hospital services including the Alfred, Royal Melbourne, The Royal Women's and the Royal Children's hospitals and an advisory group of specialist colleagues in areas such as drug and alcohol, Dentistry and Allied services such as psychology and mental health support services. ([Specialist Advisors](#))

A team meeting is held by Zoom video every morning at 8.30 where the duty doctors discuss hotel allocations, clinical handover, patient management, hotel guests numbers, arrivals and discharges etc and service plan for the day.

The mission is to provide safe and appropriate medical care to quarantined travellers in their two week stay with reference to past medical history, the unique stressors of hotel detention, ongoing care, acute medical presentations and screening and management of COVID positive cases. Special attention is made to the constraints on guests as they are detained in hotel rooms for 2 weeks, and the absence of medical records and history normally available to clinicians.

Clinical decisions and service models must adapt to the guest's detention, health service access and the restricted movements due to infection control. Investigations are generally limited to

basic pathology and Covid swabs. Escalation of investigations and clinical management are driven by the clinical need.

Due to the nature of the detention and the context of about 1-2 % of travellers being COVID positive, clinicians are urged to take a conservative approach to clinical decision making.

While clinicians are not expected to expose themselves unnecessarily to Covid 19 infections, clinical visits to guests are expected and required where examination will affect a decision or management.

Clinicians should at all times communicate their decisions and reasoning to nursing colleagues and team leaders and maintain an inclusive approach to guest management.

## Communications and Information

In order to have consistency of practice across our team, all doctors should note the following.

All immediate communications are to be through the *whatsapp* group and the daily duty doctor sub group.

All information concerning the operations of VQHMS is available on a Google drive accessible by the team

New doctors once credentialed will be registered on the master contact details for doctors and in the Whatsapp group.

Each new Doctor that comes into the service will undergo an orientation with the Clinical Lead, attend as an observer with an experienced VQHMS clinician and then commence duties as part of the team.

The rosters, duty sheets, knowledge base, reports, hotel information, guest arrival information, rosters, hotel allocations, overtime & expense claim forms, etc etc are all contained on a google drive at the following link address with a number of sub folders .

[VQHMS google drive](#)

Hotel allocations are made based on hotel numbers, clinical needs and geographic proximity. The allocations are completed the afternoon prior to duty and copies to Dhhs Ops Soteria for inclusion in the DHHS daily rosters.

### Confidentiality

The usual norms and requirements of patient confidentiality is required in all circumstances. Additionally and as part of contractual requirements that Onsite Doctor Pty Ltd has with the

State of Victoria, Onsite Doctor Pty Ltd and any and all of its agents and contractors are required to abide by these confidentiality agreements both as a matter of contract between Onsite Doctor and its agents and contractors and as a matter of professional responsibility save and except where required to by lawful direction.

## Clinical Practice.

**Best Practice (BP)** A secure private network has been established to run Best Practice Patient Management (BP) software. Best Practice must be used to record all patient contacts, eg advice to nursing staff, telephone consults, visits, referrals etc etc. A brief entry should also be made in the paper based nursing note or the nurse app web based medical record.

**Nurses App** is the DHHS web based medical record and guest management system developed for the quarantine hotels . Doctors have access and are expected to review the nursing notes and record a brief summary of their Best Practice notes in the app. Access is arranged through the clinical lead.

**Hospital referral** Where more complex investigations are required to make a clinical decision then referral to the Emergency Department may be required. Consult the ED prior to transfer. RMH for north of the river, Alfred for south of the river, RWH and RCH as appropriate. See useful phone numbers list in knowledge

**Melbourne Pathology (MP)** is the only pathology provider for general pathology. They also provide a COVID swab service. When ordering tests use your name, the provider number provided when you signed on and the words **COVID-19 MELBOURNE** as your address. Preprinted stickers are available.

**VIDRL** are the designated provider of COVID screening services. 9342 9600. Guests are screened for Covid on day 3 and day 11 of their stay

**Pathology reports** should be checked daily by the doctor ordering , This is done by selecting the in-tray icon. Results for the doctor who is logged on will be displayed. If a patient doesn't have a record in Best Practice the pathology feature will ask if you want to import the patient. When a record is created or linked Click on the action required in the action boxes. The doctor reviewing the result must action abnormal or important results appropriately

**Pathology Reports “Sweeper”**. The appointed doctor for the day will check any remaining reports in the afternoon and action the report. As we have a rolling roster and panel of doctors responsibility for results must be shared

**Shift handover.** Please hand over any clinical matter that has immediate concern to the next shift. This should be by *whatsapp* in the full group chat not the duty day sub chat so a record is available and by telephone as required.

**Follow up Log** (found under the Clinical Folder) is to be used for logging any clinical matter that requires follow up beyond the next shift handover.

The follow up log should be checked each morning and any task allocated to your hotel should be undertaken. The spreadsheet can be sorted by hotel by selecting the hotel tab at the bottom or click on the stack icon to the L lower screen to find your hotel. When the task is completed please insert date, doctor name from the list and check the box as completed.

[Clinical Follow Up Log](#)

**Consistent Clinical Practice.** The VQHMS doctors seek to practice in a consistent way given the nature of the 2 week engagement for the travellers and part of that consistency includes using standard protocols such as those set out in the Therapeutic Guidelines protocols. TG is currently free to use- see website [www.tg.org.au](http://www.tg.org.au). TG and other resources can be accessed from Clinicians Health Channel <https://www2.health.vic.gov.au/clinicianshealthchannel>. Registration is required for first use. In the registration box use "Other Metropolitan", "Vic Health", use the email address in our doctor contact details and proceed.

Clinical Advice is available from clinical lead Dr Stuart Garrow [REDACTED] or on *whatsapp* via you colleagues.

Useful links, Zoom education meetings and other info are available in the "Knowledge" folder of the Google Drive

### Special Situations

- Opiate Pharmacotherapy should be discussed with Stuart Garrow
- HiV medications and S100 drug supplies should be discussed with Dr Nate Reid a VQHMS Deputy Clínica Lead and panel Doctor.

### Generic email

If you want to send and receive documents and photos etc from guests without revealing your own email or phone number use [REDACTED] password is [REDACTED]. As Gmail is now linked to google video meeting app this email may have potential for use as a video meeting tool with guests.

### Clinical Equipment

- If you have a doctor bag please have it with you. Scripts for doctors bag drug supplies are available from clinical lead. Number to call for resupply is DOCBAGEXPRESS 1800 275 467
- Wear scrubs if you have and change out of them at the end of shift then wash daily.
- Bring a script book but if not blank A4 scripts available from clinical lead

- Small supply of Diazepam, temazepam, ondansetron and panadeine are available for doctors discretionary use.
- Epipens, Thermometers, PPE, Sphygmomanometers, urine dipsticks are available . AEDs are supplied by the hotel. Please familiarise yourself as to where they are in your hotels

### **Mental Health Pathways**

See the pathways document in the Knowledge drive. Liaise with the duty mental health nurse. Nursing staff conduct daily welfare checks. Low and mild needs may be managed by telephone consult, anxiolytic and hypnotic medications prn, and referral to Beyond Blue Covid hotline 1800 512 348. Any more complex issue should be referred to Specialist Mental Health Triage 1300 874 243 ( North West Triage) for clinical advice, discussion, escalation. They may assess further by telephone consultation and or arrange a physical visit by a mental health team.

### **Prescribing.**

Medications are provided at the DHHS expense. Quantities are restricted to an approximate period of quarantine. DHSS holds accounts at several pharmacies allocated to each hotel. Scripts may be hand written and transferred via fax or photographed and emailed. Safescript should be checked when prescribing restricted items by writing the medication into Best Practice which will automatically in real time check Safescript online. Pharmacy locations contact details are available in the google drive. [Pharmacy and Hotel info](#)

### **Policies**

Written policies and procedures are available in the google drive. All doctors must read and familiarise themselves. These cover PPE use, alcohol and drug use management policies, DHHS documents, infection control, privacy. Medications and safescript etc

[Policies and Procedures](#)

### **Infection Control**

Staff should follow state recommendations wherever possible. [Infection Prevention and Control guideline covid-19.docx](#)

Staff should not attend for work if they have symptoms consistent with COVID 19 infection. They should self isolate pending a Covid swab result

Staff should be familiar with good PPE practice by familiarise themselves with the policies and information contained in the folder [PPE policy and procedures](#)

The medical staff follow the practices established at each hotel:

- Safe distancing - where possible doctors were encouraged to have their own

office

- A “green zone” where no used PPE was to brought into the work area
- A PPE donning station to be used when going to a quarantined guests room
- A PPE doffing station on the floor of the guest room with a yellow contaminated materials bin.
- Frequent hand washing and use of hand sanitizer
- PPE use as per the DHHS guideline.
- Avoid eating in groups
- Follow the guidelines issued by DHHS

## Knowledge, Newsletter and Medical Education

**Information and clinical protocols, management guidelines**, Zoom recordings of clinical meetings, presentations, useful numbers etc can be found in the Knowledge folder in the Google drive. Please feel welcome to contribute.

**Clinical meetings** are arranged approximately 2 weekly with a guest presentation on matters relevant to our work . Please join on the day of presentation or review the recordings and slides in the knowledge folder

[Knowledge and Clinical Meetings](#)

**A newsletter** is issued approximately one to two weekly with information concerning changes in procedures, protocols, policies and housekeeping etc

[Newsletter and Reports](#)

## Quality assurance, Critical clinical events and complaints procedures

With a rolling roster of doctors, nurses, hotels and guests it is essential that procedures are in place to hand over and follow up clinical problems . The [Follow Up Log](#) will be monitored and is checked by the clinical lead. Failure to use the follow up log to record requests and actions will be considered a dismissal event.

The clinical lead will monitor clinical practice by frequent reviews of the logs, Best Practice notes, pathology requests etc and will visit the hotels to discuss practice with doctors and nursing colleagues. The Clinical Lead will meet regularly with nursing staff, team leaders and DHHS staff. From time to time the Clinical Lead will work in the hotels as a duty doctor. An open door policy is maintained for complaints, comments and email correspondence with all the Operation Soteria staff.

**Adverse events, critical incidents and near misses** should be referred to the clinical lead for investigation and action. Patient safety incidents in clinical care occur in all health settings. Incidents that cause harm are referred to as ‘adverse events’ Those that had the potential to cause harm, but did not, are referred to as ‘near misses’

The service recognises analysis of such events may identify weaknesses and areas of practice requiring review. A cycle of continuous practice review and improvement is essential in a fast paced and changing environment such as the quarantine hotels. The conclusions are incorporated into daily practice and documented as required. Events and actions taken are discussed at daily practice Zoom video meetings and in newsletters and reports. The video meetings, whats app group and the newsletters are used to provide up to date information to clinicians.

Adverse clinical outcomes, notable clinical events and complaints will always be investigated, documented and reported to the complainant in a timely manner. Processes have been established along the lines of the RACGP General Practice Standards documents.

[\(Read the Standards for general practices \(5th edition\)\)](#)

Each incident is documented in a folder with the facts of the incident, the relevant documents and clinical notes, the investigations undertaken, a summary of the conclusions and finally the actions taken and lessons learned. A summary of the events and the actions taken are kept in the register.

All complaints and events are discussed with Dr Henry Pinski as principal of OnSite Doctors. The process of investigation and outcome of complaints and incident are recorded privately in the OnSite Doctors google drive register. Any general lessons learnt and actions taken are shared as part of the knowledge update via direct communication with the Doctor and the wider group.

[Adverse events and Complaints Folder](#)

[Adverse events & Complaints Register](#)

**Audits** of equipment and practices are undertaken from time to time. Eg PPE use and training, access to automatic defibrillators, emergency drugs etc

[Quality Audits](#)

## Staff Credentials

Medical staff are credentialed, recruited and engaged by Dr Henry Pinski. Dismissals and reprimands are managed by Dr Pinski.

All staff must present their credentials, contact details, documents, provider numbers, insurance etc via a form and document upload function. Medi7 and OnSite have a privacy policy for this information

[Doctors Employment Form](#)

[Orientation checklist](#)

## Rosters, Overtime, Availability, Expenses

**Rosters** are prepared on two weekly basis. A request for availability and preferences is sent out by email and Whats app 7-10 day prior to the next fortnight. The roster is posted as a draft then finalised. Changes and swaps should be advised through the clinical lead.

**Overtime** and expenses are logged by filling out the appropriate form. Pay is weekly and expenses paid monthly

[Forms Folder](#)   [Rosters](#)

## PPE Advice for Hotel Security Staff and AO's in Contact with Quarantined Individuals

Approved

Date: 08 Jun 20 By: **REDACT**, DEP CMDR HLTH

Version 2.2

### Recommended PPE use According to Type of Activity

Setting	Activity	Security Staff	Client PPE required
<b>Hotel Lobby</b>  Perform hand hygiene before and after every client contact	Able to maintain physical distance of at least 1.5 metres	No PPE Hand hygiene	No PPE
	When accompanying clients for fresh air/exercise breaks from room to outside and able to maintain 1.5 metres  1.5 metre physical distance is <b>not feasible</b>	No PPE Hand hygiene  Surgical mask Hand hygiene	Client to wear surgical face mask if tolerated Hand hygiene Advised not to touch anything on the way out/down
<b>Hotel Lobby</b> <b>When new guests are arriving for the commencement of their quarantine</b>  Perform hand hygiene before and after every client contact	Able to maintain physical distance of at least 1.5 metres	No PPE Hand hygiene	Client to wear surgical face mask if tolerated Hand hygiene
	1.5 metre physical distance is <b>not feasible</b>	Surgical mask Hand hygiene	Advised not to touch anything on the way in/up
<b>Hotel quarantine floor</b>  Not entering the client/s room or having direct contact with client/s.	No direct client contact e.g. walking room hallways or stationed in room corridors	No PPE Hand hygiene	No PPE
<b>Doorway indirect contact by security</b>  Perform hand hygiene before and after every client contact	Any doorway visit: Able to maintain physical distance of at least 1.5 metres	No PPE Hand hygiene	No PPE
	Any doorway visit: 1.5 metre physical distance is <b>not feasible</b>	Surgical mask Hand hygiene	Client to wear surgical face mask if tolerated Hand hygiene

### Hand Hygiene

Effective hand hygiene is the single most important strategy in preventing infection.

Hands should be washed with soap and water if they are visibly soiled, otherwise alcohol-based hand rub can be used continuously.

## PPE Advice for Hotel Security Staff and AO's in Contact with Quarantined Clients

Hand hygiene should be frequently performed, including

- Before and after contact with client
- After touching a client's items or surroundings
- Before putting on and after taking off personal protective equipment (e.g. surgical mask).
- Before and after eating
- After going to the toilet

**Gloves are NOT a substitute for hand hygiene and gloves are NOT recommended for any security staff or AO staff member at any time**

**Alcohol-based hand rub is NEVER applied to gloved hands.**

(Separate advice is available for those involved with care of clients or cleaning practices)

Respiratory hygiene and cough etiquette must be applied as a standard infection control precaution at all times and perform hand hygiene each time you use a tissue or cough or sneeze into your inner elbow. Discard use tissues immediately.

### **ALWAYS AVOID TOUCHING YOUR FACE**

Correct use of PPE (Mask only)

#### PROCEDURE FOR PUTTING ON A MASK

1. Perform hand hygiene using the alcohol-based hand rub
2. Put on the mask handling the side tapes only
  - a. If your mask has ear loops, place them over both ears at the same time.
  - b. If your mask has to be tied, tie the bottom first and then the top tie to secure on your face
  - c. Ensure the mask is secured across the bridge of your nose (moulding the metal clip over bridge your nose) and ensure the masks sits snugly under your chin
3. Perform hand hygiene
4. After mask is in place never touch the front of your mask

#### PROCEDURE FOR TAKING OFF MASK

1. Perform hand hygiene using the alcohol-based hand rub
2. Do not touch the front of the mask
3. If your mask has ear loops, remove the loops and place straight into yellow bin.
4. Undo the bottom tie of your mask and then the top tie, handling the mask only by the top ties, drop mask straight into the yellow bin.
5. Perform hand hygiene using the alcohol-based hand rub

### NOTES

- Hand hygiene should be performed when you feel that you may have contaminated your hands from touching the mask if wearing one or your face
- Single-use masks should not be reused, but discarded appropriately immediately after use
- Masks must not be pulled down or removed to consume food or drink. Masks should be removed using above procedure and replaced with a fresh mask.
- Masks will be less effective if they become damp or damaged

## Summary

This document outlines the Department of Health and Human Services (DHHS) public health policy for COVID-19 in mandatory quarantine (Operation Soteria).

Identification and management of COVID-19 is undertaken in two scenarios – diagnostic testing of symptomatic individuals and routine testing by invitation to all persons in mandatory quarantine on Day 3 and Day 11 of the quarantine period.

## Policy quick reference guide

Table 1. Management based on outcomes of diagnostic testing or Day 3 routine testing

Asymptomatic	<ul style="list-style-type: none"> <li>• Must complete 14 days of mandatory quarantine</li> <li>• Should still be offered testing on Day 11 and if they become symptomatic</li> </ul>
Symptomatic	<ul style="list-style-type: none"> <li>• Remain in current location to complete 14 days of mandatory quarantine</li> <li>• May require repeat testing if symptoms do not improve (repeat testing should be directed by the on-site GP)</li> <li>• If requiring transport, they should go by Non-Emergency Patient Transport (NEPT) and should wear PPE while in t</li> </ul>
All cases	<ul style="list-style-type: none"> <li>• Transfer to the COVID hotel (Rydges) for the remainder of the quarantine period</li> <li>• Transport of positive cases (to home or to the COVID hotel) should be by NEPT and cases should wear PPE while</li> <li>• Close contacts sharing a room with positive cases should be encouraged to move to a separate room</li> <li>• When the 14-day mandatory quarantine period is complete individuals who have not yet met the department's criteria for release from isolation of a confirmed case should be managed as per confirmed cases from Day 11 testing (see bo</li> </ul>
Asymptomatic	<ul style="list-style-type: none"> <li>• If a person is currently asymptomatic and has no history of symptoms in the past 14 days, then the test date will be a proxy for a symptom onset date (Day 0) and they will be required to isolate for 10 days from this date</li> </ul>
Symptomatic	<ul style="list-style-type: none"> <li>• If a person is symptomatic, the isolation period will be determined as per the department's criteria for release from of a confirmed case</li> <li>• Release from isolation will be actively considered when <b>ALL</b> the following criteria are met: <ul style="list-style-type: none"> <li>– the person has been afebrile for the previous 72 hours, <b>AND</b></li> <li>– at least <b>10 days</b> have elapsed after the onset of the acute illness, <b>AND</b></li> <li>– there has been a noted improvement in symptoms, <b>AND</b></li> <li>– a risk assessment has been conducted by the department and deemed no further criteria are needed</li> </ul> </li> </ul>
Asymptomatic	<ul style="list-style-type: none"> <li>• Must complete 14 days of mandatory quarantine</li> <li>• Should still be offered testing on Day 11 and if they become symptomatic</li> </ul>
Symptomatic	<ul style="list-style-type: none"> <li>• Remain in current location to complete 14 days of mandatory quarantine</li> <li>• Strongly advise to be tested</li> <li>• Document that they are symptomatic, and that they have been offered and refused testing</li> <li>• If requiring transport, they should go by NEPT and should wear PPE while in transit</li> </ul>

Table 2. Management based on outcomes of Day 11 routine testing

	<b>Staying in Victoria on exit</b>	<b>Leaving Victoria on exit (interstate or international)</b>
Asymptomatic	<ul style="list-style-type: none"> <li>• <b>Subject to the Stay at Home Directions</b></li> <li>• Issue End of Detention Notice (standard)</li> <li>• Allow to exit detention</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Subject to the Stay at Home Directions until t Victoria</b></li> <li>• Issue End of Detention Notice (standard)</li> <li>• Allow to exit detention</li> </ul>
Symptomatic	<ul style="list-style-type: none"> <li>• <b>Subject to the Stay at Home Directions</b></li> <li>• Issue End of Detention Notice (standard)</li> <li>• Allow to exit detention</li> <li>• Advise to stay at home until symptoms have resolved for 72 hours</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Subject to the Stay at Home Directions until t Victoria</b></li> <li>• Allow to exit detention</li> <li>• Issue End of Detention Notice (standard)</li> <li>• Allow to travel interstate</li> <li>• Advise to stay at home until symptoms have resolved for 72 hours</li> </ul>
All cases	<ul style="list-style-type: none"> <li>• <b>Subject to the Diagnosed Persons and Close Contacts Direction</b></li> <li>• Issue End of Detention Notice (confirmed case)</li> <li>• If the person has more than 24 hours left in mandatory quarantine before they are due to exit, they should be transferred to the COVID hotel (Rydges) for the remainder of the quarantine period</li> <li>• If the person is due to exit to home within 24 hours of receiving the positive test result, the decision to transfer to the COVID hotel (Rydges) should be made on a case-by-case basis, and exiting from their current hotel to home on Day 14 may be the more appropriate arrangement.</li> <li>• When the 14-day mandatory quarantine period is complete: <ul style="list-style-type: none"> <li>– Victorians who are still infectious (who have not yet met the department's criteria for release from isolation of a confirmed case) are permitted to isolate at home, if they can do so safely and appropriately</li> <li>– Victorians who cannot safely isolate at home may continue to isolate at the COVID hotel (Rydges) until they meet the department's criteria for release from isolation of a confirmed case</li> </ul> </li> <li>• Transport of positive cases (to home or to the COVID hotel) should be by Non-Emergency Patient Transport (NEPT)</li> <li>• Positive cases should wear PPE while in transit</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Subject to the Diagnosed Persons and Close Contacts Direction</b></li> <li>• Issue End of Detention Notice (confirmed case)</li> <li>• <b>Must not travel interstate</b></li> <li>• When the 14-day mandatory quarantine period is complete: <ul style="list-style-type: none"> <li>– Individuals from interstate who are still infectious (who have not yet met the department's criteria for release from isolation of a confirmed case) are permitted to isolate at an identified residence in Victoria, if they can do so safely and appropriately</li> <li>– Individuals from interstate who cannot safely isolate at home may continue to isolate at the COVID hotel (Rydges) until they meet the department's criteria for release from isolation of a confirmed case</li> </ul> </li> <li>• Transport of positive cases (to the COVID hotel or to appropriate accommodation in Victoria) should be by NEPT</li> <li>• Positive cases should wear PPE while in transit</li> <li>• If there are concerns that the person will not safely isolate in Victoria, a further Direction and Detention Notice should be considered, in consultation with the Public Health Unit Commander and DHHS Legal</li> </ul>
Asymptomatic	<ul style="list-style-type: none"> <li>• If a person is currently asymptomatic and has no history of symptoms in the past 14 days, then the test date will be taken as a proxy for a symptom onset date (day 0) and they will be required to isolate for 10 days from this date.</li> </ul>	<ul style="list-style-type: none"> <li>• If a person is currently asymptomatic and has no history of symptoms in the past 14 days, then the test date will be taken as a proxy for a symptom onset date (day 0) and they will be required to isolate for 10 days from this date.</li> </ul>

## COVID-19 testing

### Indications for testing

Symptomatic testing should occur whenever clinically indicated (i.e. if the person is symptomatic).

If a person screens positive for symptoms or a temperature at the airport, the on-call Human Biosecurity Officer (HBO) should be contacted. The HBO should arrange for ambulance transfer to the Royal Melbourne Hospital for clinical assessment and testing. Please see the current *Border Health Measures Protocol* for further information.

Routine testing for COVID-19 is recommended for all individuals in mandatory quarantine on Day 3 and Day 11 of the quarantine period.

### General testing process

COVID-19 testing is voluntary. Quarantined individuals cannot be forcibly tested.

Testing should be carried out as early as possible on the day of testing (unless otherwise indicated), to ensure tests are processed and results reported in a timely manner.

### Informed consent

- Information on the testing process must be provided to individuals at the beginning of the quarantine period and again before testing is carried out.

- Consideration must be given to persons from non-English speaking backgrounds who may require interpreters to give their consent.
- Informed consent must be sought and documented in the nursing health record; if a test is declined, this should also be documented.
- Refusal of testing by symptomatic persons should be escalated to the appropriate lead and included in the daily report to the Public Health Commander.

### Temperature and symptom check

- A temperature and symptom check should be performed and documented each time COVID-19 testing is offered.
- If a temperature or symptoms are present, the person should be treated as a suspected case, and advised to isolate separate from other persons until the test result is known.

### Personal protective equipment

Personal protective equipment (PPE) should be used as per current department recommendations (available here: <https://www.dhhs.vic.gov.au/health-services-and-general-practitioners-coronavirus-disease-covid-19>).

### Diagnostic testing for symptomatic individuals

Individuals who are symptomatic should be tested for COVID-19 as soon as is practicable.

A returned traveller who has signs or symptoms consistent with COVID-19 should be considered a **suspected case**. Suspected cases should be given the option to isolate separate from their travel companions until the test result is known.

Of note, persons may happen to develop symptoms on Day 3 or Day 11. They should still be tested as part of the Day 3 and Day 11 testing process, but it should be clearly marked on the pathology request that they are symptomatic.

Diagnostic testing for symptomatic individuals should be coordinated by the doctors and nurses working in the hotels. In this instance, the requesting medical practitioner should be the doctor looking after that particular hotel on that date. The requesting medical practitioner is responsible for provision of the result to the quarantined individual, in addition to notifying the department if there is a confirmed case.

### Routine testing on Day 3 and Day 11

The purpose of Day 3 testing is to detect cases of COVID-19 early in the quarantine period, so that appropriate isolation arrangements can be made both for the case and their close contacts, but also to reduce the possibility of an extended quarantine (and possibly detention) period.

The purpose of Day 11 testing is to detect cases of COVID-19 before they are due to exit mandatory quarantine, so that appropriate isolation arrangements can be put in place, and to reduce the risk of transmission in the community.

Tailored information on the Day 3 and Day 11 testing process must be provided to individuals at the beginning of the quarantine period and again before testing is carried out. Consent should be sought and documented as per the above procedure.

Day 3 and Day 11 testing will not be requested of the following groups:

- Persons who are confirmed cases of COVID-19 who are still infectious and have not yet met the department's criteria for release from isolation of a confirmed case (e.g. confirmed cases residing at the COVID hotel (Rydges)).
- Persons who already have a COVID-19 test result pending.
- It should be noted that close contacts of confirmed cases who are residing at the COVID hotel (Rydges) should be offered Day 3 and Day 11 testing, as per standard practice.

Confirmed cases should not be tested again unless specifically indicated (e.g. if there is a specific clinical or public health indication, as determined by the treating medical practitioner and the department).

Where it is identified in advance that individuals are observing Ramadan and are unwilling to have a swab taken on the morning of Day 11, the test can be conducted on the evening of Day 10.

## Provision of results

Results should be provided by the medical practitioner who requested the test.

Results of routine COVID-19 tests should be provided to individuals as soon as is practicable, with priority given to the communication of positive results before negative results, and Day 11 results before Day 3 results.

Where the department (DHHS) has requested the test, it is the department's responsibility to follow-up and provide the result to individuals:

- Positive results should be provided to individuals by a nominated medical practitioner working within the department (e.g. a doctor within the Physical Distancing cell, a contracted General Practitioner, or the Operation Soteria Clinical Lead).
- Negative results should also be provided to individuals by the department, by text message, phone call or paper notification.

Positive cases should be notified of their result before they are contacted by the Case and Contact team, and this should be documented in a medical record.

## Notifications to DHHS

Notification of confirmed cases to the department must be carried out by the nominated medical practitioner described above, in addition to the testing laboratory.

## Repeat swabbing

Repeat testing should not be carried out for confirmed cases, unless recommended by the department or required for a specific purpose (e.g. to return to work in high risk settings, to enable visitor access to hospital, etc).

Clearance testing is not currently required for release from isolation, nor for release from mandatory quarantine.

# Case and contact management

## Confirmed cases

Nurses should temperature check and review symptoms of confirmed cases daily. This should be documented in the nursing record, along with the date of the acute illness onset.

## Diagnosed in mandatory quarantine

Confirmed case management is provided by a Case and Contact Officer (CCO) from the department.

Positive cases (regardless of symptom status) should be transferred to the COVID hotel (Rydges) for the remainder of the mandatory quarantine period.

Isolation periods will be determined as follows:

- If a person is currently asymptomatic and has no history of symptoms in the last 14 days, then the test date will be taken as a proxy for a symptom onset date (Day 0) and they will be required to isolate for 10 days from this date.
- If a person is symptomatic, their isolation period will be determined as per the department's release from isolation criteria.

When the 14-day mandatory quarantine period is complete:

- Individuals from Victoria who are still infectious (who have not yet met the department's criteria for release from isolation of a confirmed case) may return home to complete their isolation, if they can do so safely and appropriately at home.

- Individuals from interstate, and Victorians who cannot safely isolate at home, may continue to isolate at the COVID hotel (Rydges) until they meet the department's criteria for release from isolation of a confirmed case.

Positive cases requiring transport should be transported by Non-Emergency Patient Transport (NEPT) and should wear PPE whilst in transit.

### Entering mandatory quarantine

Confirmed cases (currently infectious or recovered) entering mandatory quarantine should be accommodated in the COVID hotel (Rydges).

The required isolation period will be determined by the Case and Contact team on a case-by-case basis.

### COVID hotel

If a confirmed case is due to exit mandatory quarantine within 24 hours to isolate at home in Victoria, the need for transfer to the COVID hotel can be assessed on a case by case basis (taking into account the duration of time the person will need to stay at the COVID hotel, and the risks associated with transfer between sites).

If a confirmed case (and potentially their family members or close contacts) are being transferred to the COVID hotel, these transfers should take place during the day where possible.

### Close contacts

Close contact management is provided by a Case and Contact Officer (CCO) from the department.

Close contacts of confirmed cases (whether symptomatic or asymptomatic):

- Must isolate for 14 days since last contact with the confirmed case.
- Should be encouraged to separate from the confirmed case so that their new quarantine period can commence.

Close contacts from Victoria who have completed the mandatory quarantine period but not the close contact quarantine period will be permitted to isolate at home (if safe and appropriate isolation arrangements can be made), otherwise they will be accommodated by DHHS in appropriate accommodation.

## Isolation and exit arrangements

### Isolation arrangements

Persons sharing a room must be informed that this may have implications for the amount of time they are required to quarantine (although not their mandatory detention period) should one of them become a confirmed case.

Where one person in a room becomes symptomatic or a confirmed case, the persons in the room should be advised to isolate in separate rooms.

### Release from isolation

#### Symptomatic cases

Confirmed cases of COVID-19 will be considered for release from mandatory quarantine, once they meet **ALL** the department's criteria for release from isolation of a confirmed case:

- the person has been afebrile for the previous 72 hours, **AND**
- at least **ten days** have elapsed after the onset of the acute illness, **AND**
- there has been a noted improvement in symptoms, **AND**
- a risk assessment has been conducted by the department and deemed no further criteria are needed

Clearance testing is not required for release from isolation, either in the home or in mandatory quarantine.

### **Asymptomatic cases**

Asymptomatic cases of COVID-19 will be considered for release from mandatory quarantine once they have been asymptomatic for 10 days since the test result.

### **Process for release from isolation**

As per the DHHS guidelines for health services and general practitioners (see <https://www.dhhs.vic.gov.au/health-services-and-general-practitioners-coronavirus-disease-covid-19>), the department will determine when a confirmed case no longer requires to be isolated in mandatory quarantine, hospital or in their own home.

- Every confirmed case that is diagnosed in Victoria is notified to the department and assigned a case and contact officer (CCO), regardless of whether they are diagnosed in detention or outside of detention. Every confirmed case receives daily contact from the case and contact team.
- The CCO will advise when it is appropriate for consideration for release from isolation, and will issue a clearance certificate (via email) to [COVIDquarantine@dhhs.vic.gov.au](mailto:COVIDquarantine@dhhs.vic.gov.au) for the case when they meet the criteria for release from isolation.

### **Exit arrangements**

Appropriate transport, accommodation and isolation/quarantine arrangements should be planned and in place for close contacts, confirmed and suspected cases about to exit mandatory quarantine. These arrangements should be in keeping with DHHS policy as per Table 2 above.

Any deviations from the agreed policy must be escalated to and approved by the Compliance and Enforcement Lead, and the Deputy Public Health Commander for Physical Distancing.

## To All SwingShift Nurses

COVID-19 continues to have a major impact throughout the world and it will be around for some time to come. As a nurse it is only a matter of time before you will be faced with caring for someone who has been exposed to the virus or has tested positive.

While caring for people with infectious diseases might be commonplace for general nurses this is a new experience for many mental health nurses. As SwingShift Nurses is a specialist mental health nursing agency this is an important issue for our nurses.

As a consequence, some nurses have elected not to work in areas where there is a risk of COVID-19 exposure.

Naturally, we are concerned for your safety and welfare. However, caring for people who are a potential infection risk can be performed safely when effective use of personal protective equipment (PPE) and appropriate infection control procedures are practised.

At some point we will be offering shifts that involve care of COVID-19 patients or patients that may have had an exposure and we want to ensure our nurses are equipped to perform their work safely.

We ask that you complete the free Australian Government online training module developed specifically for healthcare workers. It covers the fundamentals of infection prevention and control for COVID-19. The training takes just 30 minutes to complete and can be accessed at <https://www.health.gov.au/resources/apps-and-tools/covid-19-infection-control-training>. Once completed you will receive a certificate.

During these times, we regard this training as virtually mandatory for all our nursing staff. It will help dispel myths and provide you with the knowledge, skills and confidence to safely manage these patients.

As we are anticipating a surge in demand for our nurses we ask that you complete this training as soon as possible. Now is also a good time to complete electronic medical record (EMR) training for any facilities

possible. Now is also a good time to complete electronic medical record (EMR) training for any facilities that you haven't done so.

For further information please contact our office and speak with one of our friendly staff.

SwingShift Team
